## Research Interests

I am particularly interested in: 1. pushing the frontier of (multi-modal) language models' capabilities, which involves reasoning, in context learning, and long-range understanding. 2. compute-efficient learning, which involves sample efficient learning, model compression, and knowledge distillation. 3. language models as agents, which involves building (multi-modal) language models to learn from the interaction with complicated environments.

**Areas:** Large Language Models, Artificial General Intelligence, Machine Learning
